

Status Report for PhiQuest Team for Week #11

What were the goals for this week?

1. Expand administration dashboard login system: allow for username/password logins as well as oAuthentication through Google.
2. Add more elements to the admin metrics page, displaying the total number of users and total number of documents sent in card view.
3. Add comments to developed code to prepare to introduce Andre to our code (who will be taking over the project after this course is finished) as we are nearing the end of the project.
4. Create readme document for the administration dashboard to accompany the code comments for readability and clarity on our code and application.
5. Make changes to the specification document and test plan document with the feedback provided by Dr. Christensen in preparation for the final submission.

What goals were accomplished this week?

1. Expand administration dashboard login system: allow for username/password logins as well as oAuthentication through Google.
2. Add more elements to the admin metrics page, displaying the total number of users and total number of documents sent in card view.
3. Add comments to developed code to prepare to introduce Andre to our code (who will be taking over the project after this course is finished) as we are nearing the end of the project.
5. Make changes to the specification document and test plan document with the feedback provided by Dr. Christensen in preparation for the final submission.

Reflect critically on any goals not accomplished.

We failed to accomplish goal number 4 because we were occupied with preparing for our semi-final demonstration and didn't end up having enough time to create a readme along with the code comments. I believe that we were too ambitious in the goals that we picked for this week and could have kept ourselves at four, as the readme is not needed until the end of April.

What are the goals for next week?

1. Create readme document for the administration dashboard to accompany the code comments for readability and clarity on our code and application.
2. Allow a guest user to enter the dashboard in a limited mode that only shows the blockchain explorer.
3. Implement all feedback given by Jeremy during the project semi-final demonstration with PhiQuest.
4. Create the press release for the final project demonstration.

How many hours were spent on each goal noted above?

Ethan Wuitschick - (1.5) hours on goal 1, (0.5) hours on goal 2, (0.5) hours on goal 3, (0.5) hour on goal 5

Allen Chang - (1.5) hours on goal 1, (1) hours on goal 2

AJ Barea - (1) hour on goal 1, (1) hours on goal 2, (1) hours on goal 5
